Project Communications

Consider these dimensions:

- ✓ Internal and external stakeholders
- ✓ Formality or informality - content and format
- ✓ Hierarchy – adjust tone upward, downward, or horizontally
- ✓ Official or unofficial need e.g. annual reports or governance related vs. project team communication
- ✓ Written or verbal – remember tone, inflection, and nonverbal gestures are influential!

Spotlight Video: Communication Channels

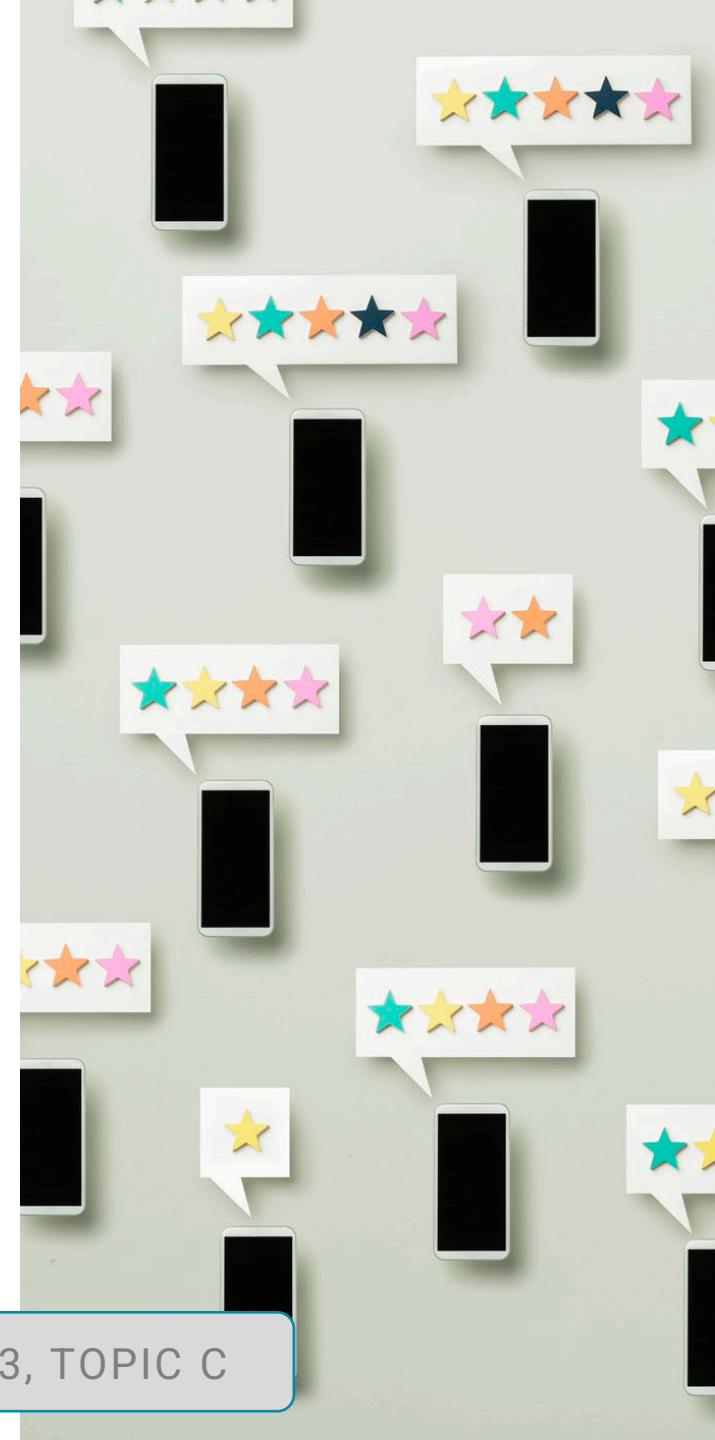

Communications Management Plan Example

Communication	Frequency	Responsibility	Stakeholder	Notes
Project Kickoff Meeting	Start of project	PMO	Key Stakeholders	Both team and client kickoff meetings recommended
Extranet	Ongoing	PMO		Includes project schedule, key project deliverables, meeting minutes, change request log, issues log

Feedback

- ✓ Communication is a **two-way street**.
- ✓ Both **critical** and **affirming** feedback are key.
- ✓ Feedback **can be positive** if received and understood as intended.
- ✓ Feedback can be negative because of misunderstanding.
- ✓ No feedback provides an implicit acceptance of the message by the receiver.
- ✓ **Effective feedback** is clear, specific, and offered in a timely manner.

GUIDELINES

Effectively Manage Communication

Manage
Communication
s, LESSON 3,
TOPIC C

- Gather and distribute contact information for all involved parties.
- Determine the **communication needs** of project stakeholders.
- Tailor amount of **detail and frequency** to recipient needs; project team members may require more detail on a more frequent basis. Senior management typically requires summary information on a less frequent basis.
- Analyze the value to the project of providing the information.
- Evaluate any constraints and assumptions to determine their possible impact on communication planning.
- Determine the **appropriate communications technologies** to use for communicating project information.
- Ensure your communications management plan includes all key elements.
- Integrate the communications management plan into the project plan.
- **Distribute** the plan to project stakeholders.

Artifacts vs. Deliverables and Project Documents

Artifacts

Project teams create artifacts during project work; these facilitate management of the project.

Project Documents

are integral documents for a project; they define and support the work of the project. They are regularly updated by project management processes.

A Deliverable

is any unique and verifiable product, result, or capability (tangible or intangible) to perform a service, that is required to be produced to complete a process, phase, or project.

Project Artifact

Artifacts enable reconstruction of the history of the project and to benefit other projects.

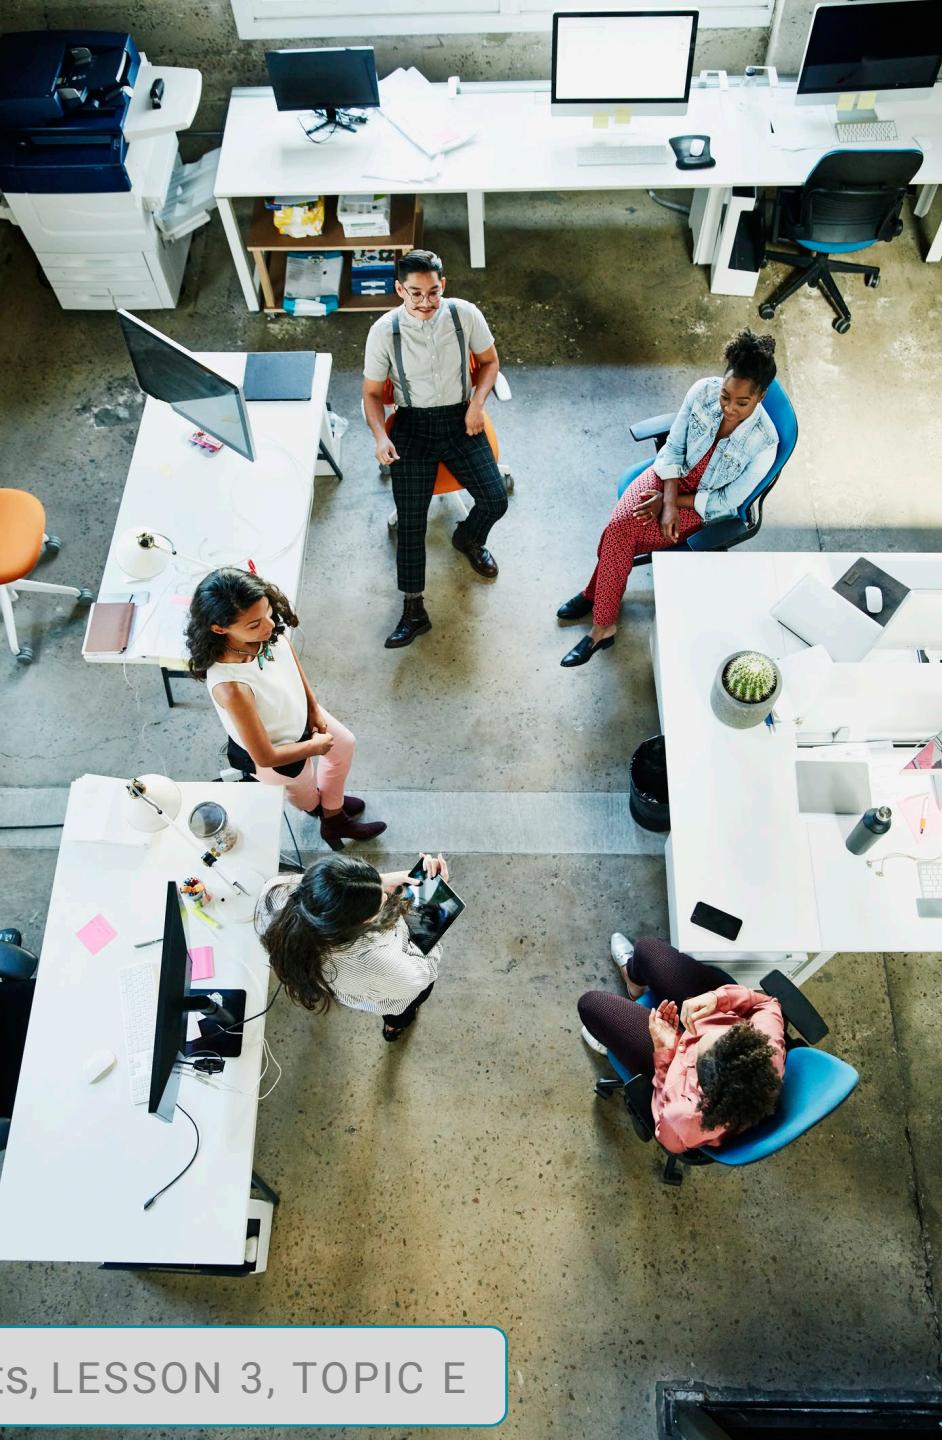

Project teams create and maintain many artifacts during the life of the project.

Project Artifact Examples

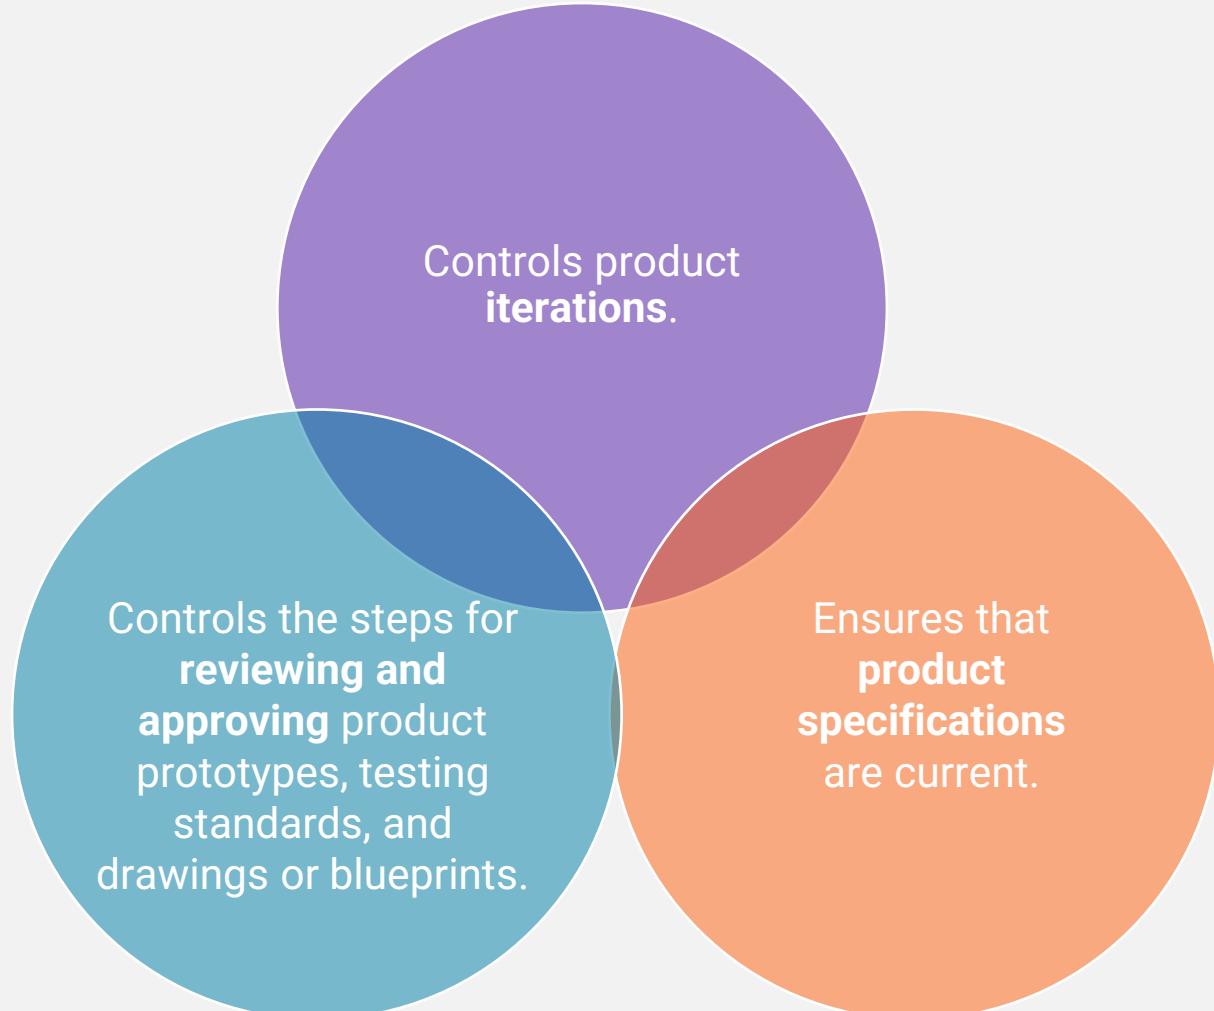

Project artifacts might include:

- ✓ Acceptance Criteria
- ✓ Assumptions
- ✓ Business Case
- ✓ Change Requests
- ✓ Constraints
- ✓ Lessons learned
- ✓ Minutes of status meetings
- ✓ Project Charter
- ✓ Slide decks
- ✓ Requirements

Configuration Management

LESSON 3,
TOPIC E

Version Control

- ✓ Each time a file is updated, give it a **new version number**.
- ✓ Include a **date/time stamp** and the name of the user who made the changes, providing a digital “paper trail” of the document’s history.
- ✓ Use version control for **important artifacts** such as the business case, project charter, requirements, and other documents.

Storage and Distribution of Artifacts

- ✓ Store artifacts in an accessible location for users.
- ✓ Use a storage and distribution system that matches the complexity of the project –
- ✓ Use cloud-based document storage and retrieval systems for larger projects, especially where team members are geographically distributed.
- ✓ Typical systems may include:
 - Built-in version control
 - Document check-out and check-in
 - User-based document security
 - Automatic email notification to specified users when a document is created or edited

Create
Project

LESSON 3,
TOPIC E

Project Artifact Management

An effective archive management system includes:

- ✓ A simple way to **produce** and **control** documents
- ✓ **Standardized** formats and templates
- ✓ A structured process for the **review** and **approval** of documents
- ✓ Version control and security
- ✓ **Timely distribution** of documents

Project
Issues,
LESSON 3,
TOPIC G

Use it to track problems, inconsistencies, or conflicts that occur during the life of the project and require investigation in order to work toward a resolution.

Issue Resolution

- ✓ As issues arise, promptly add them to the issue log.
- ✓ Assign an owner to each issue. The owner is responsible for tracking the progress of the workaround and reporting back.
- ✓ Give realistic due dates and make every reasonable attempt to meet it.
- ✓ Issues should be a regular topic of every status meeting.
- ✓ Limit the number of open issues to a manageable number.
- ✓ Don't hesitate to escalate an issue to the project sponsor if it begins to have a major effect on the project.

GUIDELINES

Resolving Issues

- Use your organization's Issue Log template; in the absence of one, create an Issue Log.
- Train project team members to promptly report potential issues.
- Enter the issue into the Issue Log and assign an owner and a due date.
- Monitor progress and discuss each open issue at every project status meeting.
- Develop a response (also known as a workaround) to the issue.
- Assess the impact of the response.
- Approve the response.
- Close the issue.
